COVER PHOTOS:

The DN34gx operation was a Field Day, 2015 weekend activation from a knoll in Idaho at 7550', 0.7 mile southwest of Lemhi Pass. Operators were K7SGP and W7GJ. Antenna shown was an M² 6M5XHG on a 24' homebrew mast.

The DN24so operation was a July 4, 2015 weekend activation at 10,350' just below the Twin Peaks Lookout, 14 miles northwest of Challis, Idaho. Operator was W7GJ. Antenna shown was an M² 6M5XHG on a 24' homebrew mast.

Further details of these and other 6m DXpeditions can be found by visiting the W7GJ website at:

http://www.bigskyspaces.com/w7gj

Good luck on 6m, and we hope to be able to contact you again from another DXpedition to a rare grid or DXCC!
